### DETAILED ACTION

Applicant's request for reconsideration of the finality of the rejection of the last Office action (in view of the filing of the English translation of the foreign priority documents) is persuasive and, therefore, the finality of that action is withdrawn.

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection as follow:

#### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 4-5 and 10-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamanaka, US 5,835,179.

Regarding the above claims, Yamanaka discloses an electro-optical apparatus (e.g. liquid crystal display device) (figure 4) comprising:

- . an electro-optical device (liquid crystal panel 2+3) having a first surface (upper surface of substrate 3), a second surface (lower surface of substrate 2) and a side surface (surface connected to wiring F);

- . a mounting case including a cover (M1), a plate (M2);

- . the electro-optical device can be used in a projector (see abstract), so as a light source, optical system and a project lens would be inherently formed.

Art Unit: 2871

Although Yamanaka does not explicitly disclose two double coated adhesive tape in the device of figure 4, Yamanaka's figure 3 clearly show the cover (M1) and the plate (M2) can be bonded to the electro-optical device by double coated adhesive tape (T and T'). Therefore, it would have been obvious to one skilled in the art at the time of the invention was made to employ the Yamanaka's device including a double coated adhesive tape for bonding purposes.

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 3-12 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 4-8 of U.S. Patent No. 6,950,308. Although the conflicting claims are not identical, they are not patentably distinct from each other because both application and patent disclose a same electro-optical device including a mounting case with double coated adhesive tape.

*Conclusion*

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
